

SETsquared Review Panel detail

The reviews are normally run as follows:

- You prepare an executive summary along with some questions for the panellists and give these to your centre manager at least one week before the review date
- Review panellists read the documents you have submitted and prepare feedback and answers to your questions ahead of your review
- You begin the review with a short presentation on progress
- You then have an hour or so to answer and ask questions about your business
- Finally, if appropriate, a number of key action points are agreed for the coming months.
- If you have a Mentor, they would normally be expected to attend the review with you. We try to maintain a consistency with your panellists throughout your time in the centre.

Reviews can help you by:

- Making recommendations on developing your enterprise
- Identifying areas which need tightening up and support
- Testing assumptions you have made
- Working with you to develop some objectives for the coming four months
- Helping make key introductions
